

## High Speed, Dual Channel Power MOSFET Drivers

The EL7202/EL7212/EL7222 ICs are matched dual-drivers that improve the operation of the industry standard

DS0026 clock drivers. The Elantec versions are very high speed drivers capable of delivering peak currents of 2.0 amps into highly capacitive loads. The high speed performance is achieved by means of a proprietary "Turbo-Driver" circuit that speeds up input stages by tapping the wider voltage swing at the output. Improved speed and drive capability are enhanced by matched rise and fall delay times. These matched delays maintain the integrity of input-to-output pulse-widths to reduce timing errors and clock skew problems. This improved performance is accompanied by a 10 fold reduction in supply currents over bipolar drivers, yet without the delay time problems commonly associated with CMOS devices. Dynamic switching losses are minimized with non-overlapped drive techniques.

Manufactured under U.S. Patent Nos. 5,334,883, #5,341,047

### Features

- Industry standard driver replacement
- Improved response times
- Matched rise and fall times
- Reduced clock skew
- Low output impedance
- Low input capacitance
- High noise immunity
- Improved clocking rate
- Low supply current
- Wide operating voltage range

### Applications

- Clock/line drivers
- CCD Drivers
- Ultra-sound transducer drivers
- Power MOSFET drivers
- Switch mode power supplies
- Class D switching amplifiers
- Ultrasonic and RF generators
- Pulsed circuits

### Ordering Information

| PART NUMBER | TEMP. RANGE    | PACKAGE    | PKG. NO. |
|-------------|----------------|------------|----------|
| EL7202CN    | -40°C to +85°C | 8-Pin PDIP | MDP0031  |
| EL7202CS    | -40°C to +85°C | 8-Pin SO   | MDP0027  |
| EL7212CN    | -40°C to +85°C | 8-Pin PDIP | MDP0031  |
| EL7212CS    | -40°C to +85°C | 8-Pin SO   | MDP0027  |
| EL7222CN    | -40°C to +85°C | 8-Pin PDIP | MDP0031  |
| EL7222CS    | -40°C to +85°C | 8-Pin SO   | MDP0027  |

## EL7202, EL7212, EL7222

### Absolute Maximum Ratings (T<sub>A</sub> = 25°C)

|  |  |
|--|--|
| Supply (V+ to Gnd) . . . . . 16.5V                     | Operating Junction Temperature . . . . . 125°C |
| Input Pins . . . . . -0.3V to +0.3V above V+           | Power Dissipation                              |
| Combined Peak Output Current . . . . . .4A             | SOIC . . . . . .570mW                          |
| Storage Temperature Range . . . . . -65°C to +150°C    | PDIP . . . . . .1050mW                         |
| Ambient Operating Temperature . . . . . -40°C to +85°C |  |

*CAUTION: Stresses above those listed in "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.*

*IMPORTANT NOTE: All parameters having Min/Max specifications are guaranteed. Typical values are for information purposes only. Unless otherwise noted, all tests are at the specified temperature and are pulsed tests, therefore: T<sub>J</sub> = T<sub>C</sub> = T<sub>A</sub>*

### DC Electrical Specifications T<sub>A</sub> = 25°C, V = 15V unless otherwise specified
