

2-channel BTL driver for CD players

BA6792FP / BA6792FP-Y

The BA6792FP and BA6792FP-Y are 2-channel BTL drivers for CD player actuator drives. HSOP 28 and 25-pin packages allow for compact applications.

●Applications

CD players and CD-ROM drives

●Features

- 1) 2 channel dedicated BTL drivers.
- 2) HSOP 28 and 25-pin power packages for compact applications.
- 3) Gain is adjustable with an attached resistor.
- 4) Internal thermal shutdown circuit.

●Absolute maximum ratings (Ta = 25°C)

Parameter		Symbol	Limits	Unit
Power supply voltage		Vcc	18	V
Power dissipation	BA6792FP	Pd	1700*1	mW
	BA6792FP-Y		1450*2	
Operating temperature		Topr	-35~+85	°C
Storage temperature		Tstg	-55~+150	°C

*1. When mounted on a 50 mm × 50 mm × 1 mm paper phenol PCB board.

Reduced by 13.6 mW for each increase in Ta of 1°C over 25°C.

*2. When mounted on a 50 mm × 50 mm × 1 mm paper phenol PCB board.

Reduced by 11.6 mW for each increase in Ta of 1°C over 25°C.

●Operation notes

(1) The BA6792FP and BA6792FP-Y have an internal thermal shutdown circuit. The output current is muted when the chip temperature rises above 175°C (typically). The driver circuit is restored when the chip temperature rises above 150°C (typically).

(2) The output current can be muted by opening the mute pin voltage or lowering it below 0.5V. This pin should be pulled up above 2.0V during normal operation.

(3) Muting also occurs when the bias pin voltage drops below 1.4V (typically). This pin should stay above 2.0V during normal operation.

(4) Muting occurs during thermal shutdown, mute-on operations or a drop in the bias pin voltage. In each case, only the drivers are muted. During muting, the output pins remain at the internal bias voltage, roughly $(V_{cc} / 2)$.

(5) Attach a bypass capacitor (roughly 0.1μF) between the power supplies, at the base of the IC.

(6) The radiating fin is connected to the package's internal GND, but should also be connected to an external ground.
