## **Errata: CS62180A/80B Rev. C**

(Reference CS62180A/80B Data Sheet revision DS225PP1 dated MAY '96)

---

This document refers to the Revision C of the CS62180 device; it describes the differences between the Revision C devices and the referenced data sheet. All errata on previous revision of the device have been corrected.

1. VDD Issue

Digital characteristics are measured over  $VDD = 5V \pm 5\%$  instead of  $5V \pm 10\%$ .

2. VIH Issue

The minimum High Level Input Voltage specification is 2.2 V over the entire temperature range of the device.

---
