I²C Bus Signal

There are 2 signals in I²C bus. SDA (Serial Data) and SCL (Serial Clock).
SDA is double-way.

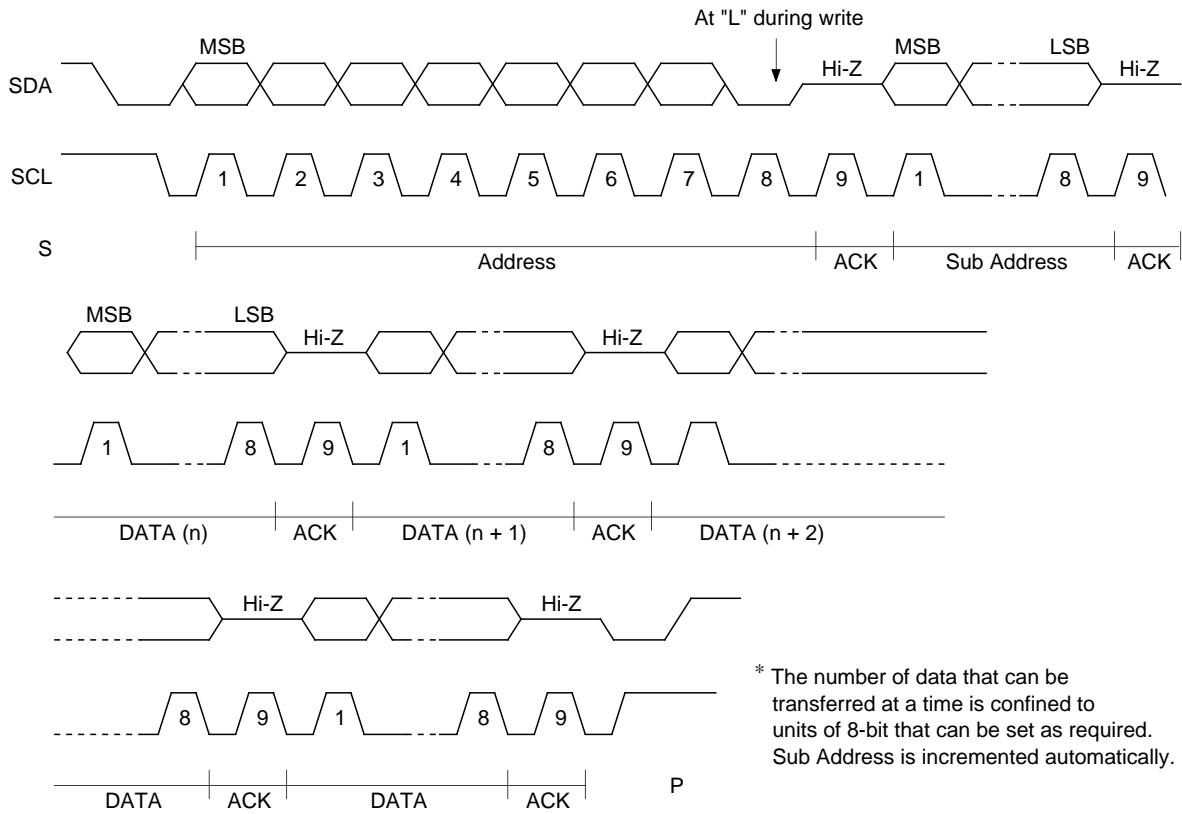

- As SDA is bidirectional it has 3 state outputs, H, L and Hi-Z.

- I²C transfer begins with Start Condition and ends with Stop Condition.

• I²C data write (Write from I²C controller to IC)

• I²C data read (Read from IC to I²C controller)

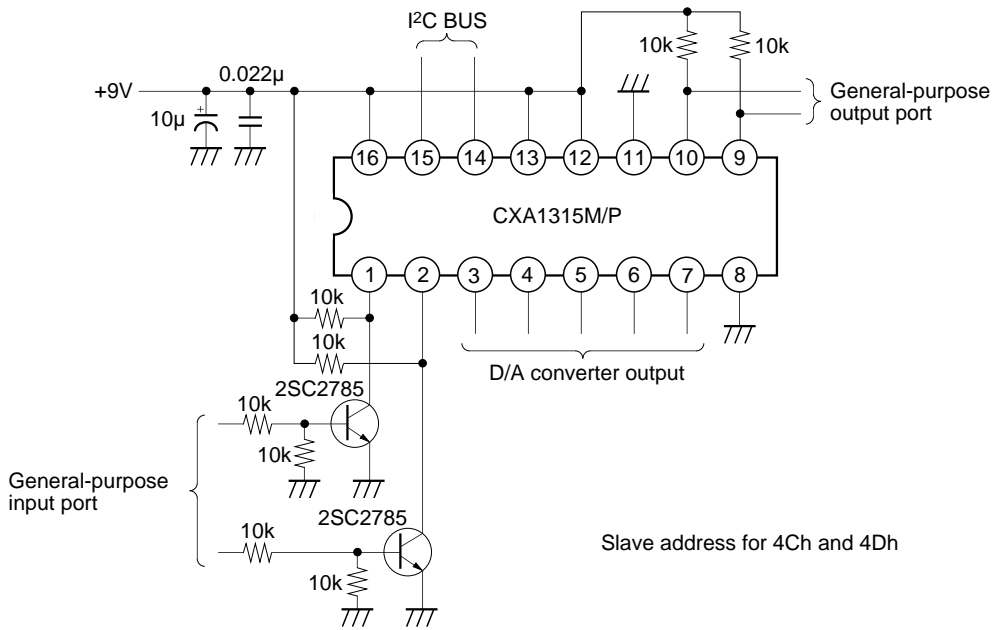

• Read timing

* Data read is performed with SCL rise.
