

D.P.P. SERIES

thick film-IC

DARLINGTON POWER PACK

General Description

D.D.P. series are designed to meet requirement for high performance of audio components. The rate of total harmonic distortion are less than 0.03% (0040, 0049, 0055, 0059, 0060, 0070, 0080, 0105) and 0.03% (0025, 0029, 0030, 0035, 0039) at rated output 20KHz/4Ω, and typically 0.004% at 1/3 rated output 1KHz/4Ω.

FEATURES

General output stage of power amplifier has a difficult and complex problem about heat sink designing and its setting. Sanyo's D.P.P. intends to decrease electronic parts and

rationalize a manufacturing process by designing IC of only output stage of power amplifier.

- IMST system.
- Output stage for AF high power amplifier.
- Dual power supply
- Darlington type pure/quasi-complementary circuit.
- These same pin assignment and pin interval lead to standardize a printed board.
- Metal substrate use IMST[®] makes good thermal stability.
- Able to design freely previous section of power amplifier. This leads tone control designing.

ABSOLUTE MAXIMUM RATINGS at Ta=25°
