MOS FIELD EFFECT TRANSISTOR

2SK679A

N-CHANNEL MOS FET FOR HIGH-SPEED SWITCHING

PACKAGE DIMENSIONS (Unit : mm)

1. Gate (G)
2. Drain (D)
3. Source (S)

(Diode in the figure is the parasitic diode.)

The 2SK679A, N-channel vertical type MOS FET, is a switching device which can be directly driven from an IC operating with a 5 V single power supply. The device featuring low ON-state resistance is of the voltage drive type and thus is ideal for driving actuators such as motors, solenoids, and relays.

FEATURES

- Low ON-state resistance
 $R_{DS(on)} = 1.0 \Omega$ MAX. at $V_{GS} = 4.0$ V, $I_D = 0.5$ A
 $R_{DS(on)} = 0.7 \Omega$ MAX. at $V_{GS} = 10$ V, $I_D = 0.5$ A
- Voltage drive at logic level ($V_{GS} = 4$ V) is possible.
- Bidirectional zener diode for protection is incorporated in between the gate and the source.
- Inductive loads can be driven without protective circuit thanks to the improved breakdown voltage between the Drain and Source.

QUALITY GRADE

Standard

Please refer to "Quality grade on NEC Semiconductor Devices" (Document number IEI-1209) published by NEC Corporation to know the specification of quality grade on the devices and its recommended applications.

The devices listed in this document are not suitable for use in the field where very high reliability is required including, but not limited to, aerospace equipment, submarine cables, nuclear reactor control systems and life support systems. If customers intend to use NEC devices for above applications or those intended to use "Standard", or "Special" quality grade NEC devices for the applications not intended by NEC, please contact our sales people in advance.

Application examples recommended by NEC Corporation

Standard: Data processing and office equipment, Communication equipment (terminal, mobile). Test and Measurement equipment, Audio and Video equipment, Other consumer products, etc.

Special: Automotive and Transportation equipment, Communication equipment (trunk line), Train and Traffic control devices, industrial robots, Burning control systems, antidisaster systems, anticrime systems etc.
