

Chip trimmer potentiometers

MVR34

The MVR34 chip trimmer potentiometer is designed for use in automatic regulators. With its highly stable and reliable ruthenium oxide resistor on an alumina substrate, it offers outstanding dependability in a small, lightweight package.

●Features

- 1) Excellent for use in automatic regulators.
 - 2) Easy to set manually using a regular phillips screwdriver.
 - 3) Superb solderability thanks to extra soldering electrode.
 - 4) Close match between wiper and dielectric reduces noise.
 - 5) Mounting can be automated by using a carrier tape.
 - 6) Two-digit markings used to indicate resistance.
 - 7) ROHM resistors have approved ISO-9001 certification.
- Design and specifications are subject to change without notice. Carefully check the specification sheet before using or ordering it.

●Ratings

Rated power	Power must be derated according to the power derating curve in Figure 1 when ambient temperature exceeds 70°C.  Fig.1	0.1W (1 / 10W) / element at 70°C
Rated voltage	The voltage rating is calculated by the following equation. If the value obtained exceeds the maximum operating voltage, the voltage rating is equal to the maximum operating voltage. $E = \sqrt{P \times R}$ E: Rated voltage (V) P: Rated power (W) R: Nominal resistance (Ω)	Max. operating voltage : 50V
Nominal total resistance range		100 to 1MΩ (recommended resistance value: E3 series) (applicable resistance value: E6 series)
Total resistance tolerance		±25%
Resistance variation		B (linear) characteristics
Effective rotation angle		220±20°
Operating temperature		−55°C to +125°C
Reactive variable	Rotational angle, both ends	within 10% (R > 150 Ω) within 20% (R ≤ 150 Ω)

●Before using components in circuits where they will be exposed to transients such as pulse loads (short-duration, high-level loads), be certain to evaluate the component in the mounted state. In addition, reliability and performance of this component cannot be guaranteed if it is used with a steady state voltage that is greater than its rated voltage.
