**For AF driver and output stages of medium performance**

BD 136, BD 138, and BD 140 are epitaxial PNP silicon planar transistors in TO 126 plastic package (12 A 3 DIN 41869, sheet 4). The collector is electrically connected to the metallic mounting area. Together with BD 135, BD 137, and BD 139 as complementary pairs the transistors BD 136, BD 138, and BD 140 are designed for use in driver stages of high performance AF amplifiers.

Approx. weight 0.5 g      Dimensions in mm

Transistor fixing with M 3 screw. Starting torque max 0.8 Nm. Below the screw head, a washer or spring washer should be used.  
 1) If a 60 μ mica washer (ungreased) is used, the thermal resistance increases by 8 K/W and in case of a greased one by 4 K/W.
