

AN5186FB

VIF/SIF IC for car-TV

■ Overview

The AN5186FB is a VIF/SIF signal processing IC for in-car television. The video and sound are completely separated by the adoption of split carrier method. Also, high performance and high function have been realized by the incorporation of in-car circuits such as soft mute and SD.

■ Features

- Split carrier method sound detection circuit
- Electric field detection and band detection type soft mute and SD
- Multipath detection circuit
- VIF uses quasi-synchronous detection which is invulnerable to electric field fluctuation.
- Video output pin for diversity detection (no noise inverter)

■ Applications

- In-car televisions

Note) The package of this product will be changed to lead-free type (QFP044-P-1010F). See the new package dimensions section later of this datasheet.

Pin No.	Equivalent circuit	Description	voltage
1	—	Power supply pin 1: Power supply pin for VIF Use range; 7.2 V to 10 V (typ. 8 V)	DC (typ. 8 V) [Z = low]
2		VIF detection coil pin 1	$f_p = 58.75\text{M}$ $\angle 0^\circ$ phase shift DC, approx. 3.8 V [Z = 2.4 kΩ]
3		VIF detection coil pin 2	$f_p = 58.75\text{M}$ $\angle 0^\circ$ phase shift DC, approx. 3.8 V [Z = 2.4 kΩ]
4		SD detection adjusting pin: Detection sensitivity adjustment for SD output	DC approx. 2.1V [Z = 16 kΩ]
5		AFT detection coil pin	$f_p = 58.75\text{M}$ $\angle 90^\circ$ phase shift DC, approx. 2.6 V [Z = 6 kΩ]

■ Terminal Equivalent Circuits (continued)

Pin No.	Equivalent circuit	Description	voltage
6		Multipath detection adjusting pin: Detection sensitivity adjustment of multipath output	DC approx. 1.9 V [Z = 6.8 kΩ]
7		Video output pin 2	AC approx. 2 V[p-p] [Z = low]
8		Video output pin 1: Output after passing through noise inverter	
9		Soft mute filter pin 1	DC 0 V to 4.1V [Z = 25 kΩ]
10		Audio output pin	AC (differs according to input conditions) [Z = 380 Ω]

■ Terminal Equivalent Circuits (continued)

Pin No.	Equivalent circuit	Description	voltage
11		Soft mute filter pin 2: Adjusting voltage of ASC and ATC, etc.	DC [Z = 200 Ω]
12		S meter voltage output pin 1	DC 0 — ↗ Signal input level [Z = 270 kΩ]
13		Multipath input pin: Detection sensitivity is adjusted by external resistor.	DC approx. 1.9 V [Z = low]
14		Multipath detection pin	DC, approx. 1.2 V [Z = 6.3 kΩ] Rising low Falling 330 Ω
15		Multipath output pin	DC approx. 1.9 V (0 V to 4.1 V) [Z = 18 kΩ]
16		AFC output pin	DC approx. 4.2 V 5 V — — 3.5 V

■ Terminal Equivalent Circuits (continued)

Pin No.	Equivalent circuit	Description	voltage
17	—	Power supply pin 2: Power supply pin for SIF Use range; 7.2 V to 10.0 V (typ. 8 V)	DC (typ. 8 V)
18		SIF detection coil pin	AC approx. 0.9 V[p-p] ∠90° phase shift DC, approx. 8 V [Z = high]
19		Soft mute adjusting pin 1: Soft mute start point adjustment	DC (0 to V_{REF}) (4.2 V) (voltage input from outside) [Z = high]
20		Soft mute adjusting pin 2: Soft mute gradient adjustment	DC [Z = low]
21		2nd limiter input pin	DC = 0 V [Z = 300 Ω]

■ Terminal Equivalent Circuits (continued)

Pin No.	Equivalent circuit	Description	voltage
22		GND pin 2: GND pin for SIF	— [Z = low]
23		1st limiter output pin	AC fs = 10.7M DC approx. 4.0 V [Z = 500 Ω]
24		SIF reference voltage: Reference voltage pin for SIF	DC approx. 4.2 V [Z = low]
25		S meter voltage adjusting pin	DC approx. 3.5 V [Z = low]
26		1st limiter bias pin	DC approx. 3.1 V [Z = 7.5 kΩ]
27		1st limiter input pin	AC fs = 10.7M DC approx. 3.1 V [Z = 300 Ω]

■ Terminal Equivalent Circuits (continued)

Pin No.	Equivalent circuit	Description	voltage
28		GND pin 3: GND pin for mixer	— [Z = low]
29		SD output pin	 [Z = 200 Ω]
30		Mixer output pin	AC [Z = 200 Ω]
31	—	Power supply pin 3: Power supply pin for mixer Use range; 7.2 V to 10.0 V (typ. 8 V)	DC (typ. 8 V) [Z = low]
32		OSC input pin 1	DC approx. 7.0 V [Z = 300 Ω]
33		OSC input pin 2	DC approx. 4.4 V [Z = 5 kΩ]

■ Terminal Equivalent Circuits (continued)

Pin No.	Equivalent circuit	Description	voltage
34		RF AGC delay adjusting pin	DC approx. 4.4 V [Z = high]
35		IF AGC output pin	DC [Z = high]
36		IF AGC input pin	DC [Z = high]
37		SIF input pin 1	AC f = f _s (54.25 MHz) DC level approx. 2.7 V
38		SIF input pin 2	[Z = 3 kΩ]

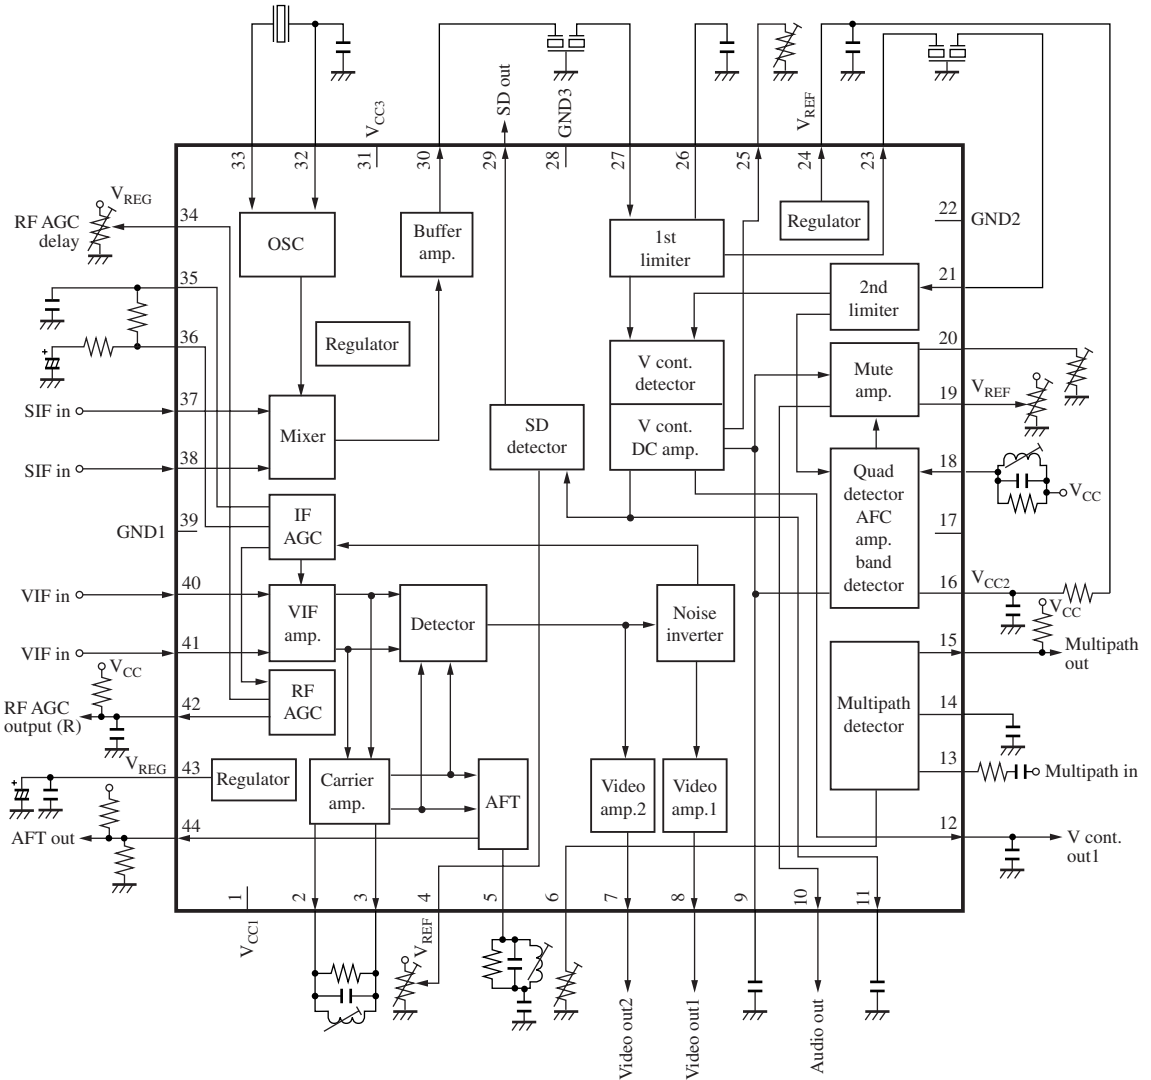

■ Terminal Equivalent Circuits (continued)

Pin No.	Equivalent circuit	Description	voltage
39		GND pin 1: GND pin for VIF	— [Z = low]
40		VIF input pin 1	AC f = fp (58.75 MHz) DC level approx. 2.6 V
41		VIF input pin 2: Input for VIF amp. and balanced input	[Z = 2 kΩ]
42		RF AGC output pin: Collector open output so that arbitrary bias is usable. (max. 12.5 V)	DC
43		VIF reference voltage pin: Reference voltage pin for VIF	DC level approx. 5 V [Z = low]

■ Application Circuit Example

Request for your special attention and precautions in using the technical information and semiconductors described in this material

- (1) An export permit needs to be obtained from the competent authorities of the Japanese Government if any of the products or technologies described in this material and controlled under the "Foreign Exchange and Foreign Trade Law" is to be exported or taken out of Japan.
- (2) The technical information described in this material is limited to showing representative characteristics and applied circuit examples of the products. It does not constitute the warranting of industrial property, the granting of relative rights, or the granting of any license.
- (3) The products described in this material are intended to be used for standard applications or general electronic equipment (such as office equipment, communications equipment, measuring instruments and household appliances).
Consult our sales staff in advance for information on the following applications:
 - Special applications (such as for airplanes, aerospace, automobiles, traffic control equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body.
 - Any applications other than the standard applications intended.
- (4) The products and product specifications described in this material are subject to change without notice for reasons of modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.
- (5) When designing your equipment, comply with the guaranteed values, in particular those of maximum rating, the range of operating power supply voltage and heat radiation characteristics. Otherwise, we will not be liable for any defect which may arise later in your equipment.
Even when the products are used within the guaranteed values, redundant design is recommended, so that such equipment may not violate relevant laws or regulations because of the function of our products.
- (6) When using products for which dry packing is required, observe the conditions (including shelf life and after-unpacking standby time) agreed upon when specification sheets are individually exchanged.
- (7) No part of this material may be reprinted or reproduced by any means without written permission from our company.

Please read the following notes before using the datasheets

- A. These materials are intended as a reference to assist customers with the selection of Panasonic semiconductor products best suited to their applications.
Due to modification or other reasons, any information contained in this material, such as available product types, technical data, and so on, is subject to change without notice.
Customers are advised to contact our semiconductor sales office and obtain the latest information before starting precise technical research and/or purchasing activities.
- B. Panasonic is endeavoring to continually improve the quality and reliability of these materials but there is always the possibility that further rectifications will be required in the future. Therefore, Panasonic will not assume any liability for any damages arising from any errors etc. that may appear in this material.
- C. These materials are solely intended for a customer's individual use.
Therefore, without the prior written approval of Panasonic, any other use such as reproducing, selling, or distributing this material to a third party, via the Internet or in any other way, is prohibited.
