54F/74F579 8-Bit Bidirectional Binary Counter with TRI-STATE Outputs

54F/74F579 8-Bit Bidirectional Binary Counter with TRI-STATE® Outputs

General Description

The 'F579 is a fully synchronous 8-stage up/down counter with multiplexed TRI-STATE I/O ports for bus-oriented applications. It features a preset capability for programmable operation, carry lookahead for easy cascading and a U/ \bar{D} input to control the direction of counting. All state changes, whether in counting or parallel loading, are initiated by the rising edge of the clock.

Features

- Multiplexed TRI-STATE I/O ports
- Built-in lookahead carry capability
- Count frequency 100 MHz typical
- Supply current 75 mA typical
- Guaranteed 4000V minimum ESD protection
